PROFESSIONAL EXPERIENCE

Full Stack Developer
Atos Poland Global Services
05/2022 – 09/2023 | Poland

- Developed and maintained full-stack applications, utilizing modern technologies and frameworks to deliver robust and user-friendly solutions.
- Collaborated with cross-functional teams to gather requirements, design system architecture, and implement scalable and efficient solutions.
- Integrated third-party APIs and services, ensuring seamless data flow and enhancing the functionality of web applications.
- Conducted code reviews, implemented best practices, and mentored junior developers to improve code quality and foster a collaborative development environment.

Full Stack Engineer
Intel Technology
08/2019 – 03/2022 | Poland

- Created a search system for finding branches and ATMs filtered by various criteria, including a nearby feature.
- Wrote unit tests and integration tests using JUnit and Cucumber.
- Implemented performance optimizations by introducing long caching on top of a Geo Time Zone API.
- Ensured that all of the REST APIs adhered to JSON API standards.
- Implemented the front end using React and developed components from scratch.

PROJECTS

E-commerce Platform
A scalable and secure e-commerce platform built using React, Node.js, and MongoDB. Integrated with various payment gateways and shipping providers, providing a seamless shopping experience for customers.

CRM System
A custom CRM system developed using Angular, Django, and PostgreSQL. Implemented advanced reporting features and automated workflows, improving team productivity and customer satisfaction.
